

When to Call Your Cal-Waste Representative

There may be a time when you question the schedule, volume, or size of your service.

- Please contact our customer service department if you find there is a marked increase or decrease in your volume of generated trash or recycling. Often this happens seasonally. We will help you adjust your service so as not to overload your containers and enclosures or, alternatively, find you are not consistently filling your containers. We are happy to help you adjust your service.
- Be certain to call if you find a broken wheel, lid, or damaged container. We will help ensure you have fully functioning equipment to collect your trash and recycling.
- Our Cal-Waste customer service department is here to help you any time you have a question concerning your commercial service. They will be happy to answer your questions or connect you with your personal Cal-Waste representative.
